PROFILE STATEMENT

Data Analyst and Applied Geoinformatics professional with practical experience in **data analysis, spatial analytics, data visualization, and geospatial data processing**. Skilled in **Python, SQL, Excel, Power BI, Tableau, ArcGIS Pro, and QGIS**, with experience transforming complex datasets into meaningful analytical and visual outputs. Strong background in environmental, spatial, and socio-economic data analysis, with an interest in using data to support research and evidence-based decision-making.

EXPERIENCE

IGN/Geodataparis

Intern – Geovisualization

April '26 - present

Paris, France.

- Analyse and visualize complex ensemble coastal flood datasets for the **Arcachon Basin**.
- Process **NetCDF-based spatial datasets** and generate flood indicators for environmental analysis.
- Apply **Python, ArcGIS Pro, and QGIS** for data processing, spatial analysis, and visualization workflows.
- Produce thematic and analytical maps highlighting vulnerable shoreline and inhabited areas.
- Transform complex geospatial information into clear visual outputs to support coastal flood research and interpretation.

Solidarity & Unity

Intern – Data Analyst

Feb '26 - Mar '26

Amsterdam, Netherlands

- Supported the analysis of **refugee and asylum-related datasets**, with a geographical focus on Tanzania.
- Assisted with GIS and spatial data analysis to identify and communicate geographic patterns.
- Supported data visualization and preparation of analytical outputs.
- Contributed to data-driven reporting and communication of research findings.

EDUCATION

Paris Lodron University of Salzburg

Master of Science in (Applied Geoinformatics)

Ondo State University of Science and Technology

Bachelor of Technology in (Physics)

Mar '23 - Jul '26

Salzburg, Austria.

Nov '12 - Dec '17

Okitipupa, Nigeria.

TECHNICAL SKILLS

Data Analysis & Programming: Python, SQL, Excel, JavaScript

Data Visualization & BI: Power BI, Tableau, ArcGIS StoryMaps, Excel

Databases & Data Management: PostgreSQL, PostGIS, Spatial Databases, Data Processing

GIS & Spatial Analytics: ArcGIS Pro, ArcGIS Enterprise, QGIS, Google Earth Engine, Remote Sensing

Web & Digital Technologies: HTML, CSS, JavaScript, PowerApps, Power Automate, SharePoint

Other: Microsoft 365, Project Management, Communication

SELECTED DATA ANALYTICS PROJECTS

- **Great places to explore in summer (Salzburg City):** Interactive maps displaying places to visit in summer with HTML, CSS, JavaScript, [Link](#).
- **Austria Employment Insight (SDI):** Spatial data Infrastructure with SQL, PostGIS ArcGIS Pro, Web Services (WMS, WFS, Feature layer) and [Link](#).
- **Malaria Incidence in Nigeria:** A study that discuss the factors influencing malaria incidence in Nigeria with Python, PostGIS, Dashboard, Story [Link](#).

CERTIFICATIONS

- Data Analysis Bootcamp — Python Programming for Data Science
- Advanced Spatial Data Management — Data Processing & Spatial Modelling
- Spatial Analysis
- Cartography
- Remote Sensing for Environmental Analysis
